

Find the best Heat Treated Pallets across Maharashtra & Goa, offering at the best price.

Discover a wide range of heat treated pallets and Explore available options for various types, including Wooden Heat Treated Pallets, Wooden Euro Pallets, Plastic Pallets and more.

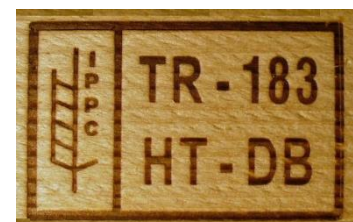

For businesses looking for minimal costs but maximum quality, reconditioned pallets are the ideal choice.

With the widespread use of wooden pallets worldwide, their ability to be easily reconditioned and reused provides a sustainable pallet solution with benefits for both customers and businesses.

All pallets are Heat Treated under ISPM-15 Seal.

ISPM 15 stands for the International Standards for Phytosanitary Measures No.15. These ISPM-15 rules and regulations were created to stop the spread of disease and pests by using wood packaging materials for international shipment. If you are looking to export wooden packing materials, they should be treated with Heat Treatment. The Government has decided on 2 treatments Compulsory for Export Shipment.

- 1. ISPM-15 Heat Treatment**
- 2. ISPM-15 Fumigation Treatment**

This certification will make sure that the product has been treated in a specific manner, making it less susceptible to damage. The stamp will show that your timber materials have been Heat Treated.

WHY CHOOSE REFURBISHED HEAT TREATED PALLETS?

There are three reasons that businesses are choosing to use refurbished heat treated pallets, instead of buying new pallets.

- ✓ They can save you a tons of money
- ✓ They are good for the environment
- ✓ You get the same amount of service life

We firmly believe that 2024 is going to be a great year for recycling. The Government is becoming more committed to reducing our reliance on single use plastic products and consumers are becoming more aware of recycling initiatives.

We all understand that recycling and reusing is good for the environment, we're all becoming acutely aware that human's impact on the earth is at a critical tipping point, and while there are some positive signals on the horizon, we still understand that more needs to be done.

But did you know that recycling isn't only good for the environment, it's great for businesses too, you just have to understand how recycling can help your business' bottom line. Savings can be made on essential supplies, and even the land your business is built on, by recycling and reusing.

Logistics & Supply

Plus, as other businesses and consumers become more aware of recycling issues, companies who are responsible and proactive will find themselves at the top of the 'would like to do business with' list. So making strides in recycling and reusing can benefit the environment and your business' potential.

At Esti we have a 'zero to landfill' practice in place, all the materials we use can be recycled or reused so we make good use of them. If there's any material we cannot use, reuse or recycle, we don't procure them.

We guarantee responsible practice, where most companies cannot. We don't cut corners because we're passionate about providing a top-notch service as well as being environmentally responsible.

If you'd like to book a no-obligation site visit to see how we could help reduce your company's COST with environmental impact, whether you need Boxes, pallets or both, **call us on 900 434 6249** or email us info@estipack.com
